Questionnaire Design

1. In your political life, you are a member of the Republican/Democratic party. How would you describe your personal political philosophy, and how does that compare to the stated ideology of the party?
2. To what degree do you think your personal life and your gender influence your governorship? If you have religious affiliation, how extensively does your religious belief affect your policy positions and the way you govern?
3. For this study, we are specifically interested in how female governors treat the issue of reproductive rights. Please relay to us your stance on this topic, and discuss the factors that affected the development of your position as specifically as possible.
